REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and apparatus interference cancellation for a DS-CDMA communication system. A thorough and exhaustive search has failed to teach a method or apparatus comprising; "an interference replicating unit being associated with the high-rate channels for creating interference replicas of the high-rate channels from received signals; and an adder for subtracting only the interference replicas of the high-rate channels from the received signals" as disclosed in claims 1, 6, 11, 14. The prior art also fails to teach a path searcher or method comprising; " a path detection part for setting a first threshold and selecting paths in the delay profile for the low-rate channels exceeding the first threshold; a second memory for storing the first threshold; and the path selection part for selecting paths in the delay profile for the high-rate channels exceeding the first threshold" or "storing a delay profile for the low-rate channels and a delay profile for the high-rate channels; setting a first threshold and selecting paths in the delay profile for the low-rate channels exceeding the first threshold; storing the first threshold; and selecting paths in the delay profile for the high-rate channels exceeding the first threshold" along with the remaining limitations of claims 15 and 17, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
